DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a) typographical errors. See for example the word “triphenylphosphin”.Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The word “trichlorophosphin”, in claims 1-4, is incorrect. It should be “trichlorophosphine”. Please correct.
4. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The compound recited in line 2, “tris(triphenylphosphin)-rhodium(1)chloro(triphenylphosphine)-rhodium(I)”, appears to be incorrect. It appears that the compound “choro(triphenylphosphine)-rhodium(I)” was intended. Please clarify.

Allowable Subject Matter

5. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Note that the inventive feature of claim 1, the temperature control stages of the reaction, is not taught or disclosed in the prior art of record.
